

solo®

THE BETTER CHOICE. SINCE 1948.
German quality sprayers and cut-off machines

Product Information Professional Pressure Sprayer 456 PRO

Very robust pressure sprayer for professional use. All gaskets and seals installed are made of FPM material (Viton®).

Plant protection applications in the professional sector, for medium sized areas in glass houses, tree nurseries, horticulture and landscaping industry.

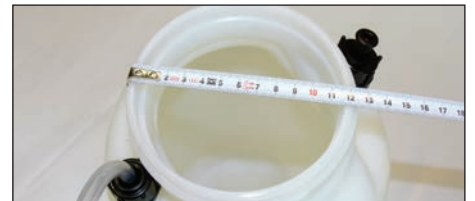

Best suited for the tradesman and for industrial use, for disinfection and cleaning as well as for the fight against pests and infectious diseases.

Extendable spray wand and high value brass nozzles: flat spray nozzle and adjustable hollow cone nozzle.

Operational benefits

- Suitable for use with all approved plant protection mediums (herbicides, fungicides, insecticides and applicable biological plant protection liquids), disinfection and cleaning fluids (surface cleaners, algae and moss removers, stone cleaners, fungi and mould removers).
- Most stable spray pressure container on the market. The tank wall, made of UV stabilized polyethylene, is thick and strong. The liquid level in the tank can be easily seen through the semi-transparent material and the volume is read against markings on the tank wall.
- Robust pump- and carrying handle, fitted with 2 clamp-like holders of different diameter to securely hold all available plastic, brass or carbon fibre wands that are available in the SOLO accessory program.
- Large filler opening to allow easy and quick filling of the tank.
- All gaskets and seals on the unit are made of FPM material (Viton®) and are resistant against aggressive chemicals.
- Carrying strap with adjustable shoulder pad allows high carrying comfort, kink-free and fabric reinforced hose plus a robust trigger handle.

- Almost unbreakable spray wand that can be extended for increased spray reach with a supplied extension piece.
- Two nozzles are included in the standard supply package: adjustable brass hollow cone nozzle for universal use and a brass flat spray nozzle for area spraying. The nozzle cap nut allows the use of current ISO standard nozzles.
- Oversize piston pump: maximum pressure is achieved with comparatively few pump strokes. An automatic safety valve protects the operator. It can also be manually operated for fast pressure release.
 - Comprehensive SOLO Accessory Assortment.

Very large opening for filling and cleaning

Wide and long carrying strap with comfortable and adjustable shoulder pad

Special trigger valve with VITON® seals and stainless steel spring

Model	456 PRO
Part no.	4000156401011
Nominal capacity litres	5,0
Max. spray pressure bar	3
Dry weight kg	2,6
Hose length m	1,4 m
Spray wand	50 cm
Std. supply	FPM seals (Viton®) Wand extension 50cm Adjustable brass hollow cone nozzle Brass flat spray nozzle 02 E 80
