

# PT Exoroach® Service Kit

For use only with  
PT Exoroach® Cockroach Station

## Directions for use

<b>Contents:</b>	Sachet of Entostat powder, glue board and food lure tablet.
<b>Storage:</b>	Stored under cool, dry conditions shelf life should be 2 years. Ensure the lure is stored unopened.
<b>Safety Precautions:</b>	None required
<b>Disposal of Glueboards:</b>	Place into a sealed plastic bag and dispose of as household waste
	Remove the white lid of the trap using a coin
	Unclip the base of the unit. Peel the protective cover from the glue board, being careful not to touch the adhesive side of the sheet, as it is very sticky.
	Place the adhesive sheet into the base of the unit with the "sticky" surface up.
	Clip the trap onto the flat base.
	Empty the sachet of Entostat™ powder into the plastic bag in which the kit is supplied. Take the bridge and place inside the bag, seal it and shake well to coat the Entostat™ powder over the entire surface of the bridge.

## PT Exoroach® Service Kit

	<p>Remove the coated bridge from the plastic bag, touching only the raised lugs. Give the bridge a final shake to remove excess powder. Clip the bridge onto the base and wipe the base free of powder.</p>
	<p>Remove the lure tablet from the wrapper and place it into the recess in the centre of the bridge.</p>
	<p>Line up the locking mechanisms as shown on the white lid. Press the fixing lugs down into the slots on the top of trap and turn through 90° to the locked position.</p>
	<p>Make sure that the trap cover is securely locked in place.</p>
<p>Place the PT Exoroach® Cockroach Station in a warm, damp, dark location where adults have been seen, such as along edges of rooms, under furniture or equipment. Check 72 hours after placement, if no catches are found move to an alternative location.</p> <p>Do not spray or otherwise treat trap with pesticide. Replace the glue board and lure after a maximum of 2 months or when the glue board is full.</p>
